KNOW THE BEAUTY OF INNOVATION

# about us

## ABOUT PLASTPRO

Established in 1994, Plastpro introduced the first all-composite stiles and rails that protect the door on all six sides. In 2005, Plastpro opened a 250,000 square-foot plant in Ashtabula, Ohio. Plastpro's Ashtabula plant is the first and only fiberglass door manufacturer with a fully automated facility. Unlike traditional door production, which is largely a manual operation, Plastpro's Ashtabula plant relies heavily on automation and is two to three times more productive than traditional manual fiberglass door manufacturer. In addition to shortening lead times by up to 75% compared to its competitors, the plant allows Plastpro to sell "MADE IN USA" products and gives it the flexibility to produce many different door designs as well as custom products.

## CRAFTSMANSHIP

Old world craftsmanship meets new world technology to make Plastpro's fiberglass entry doors the most advanced products available on the market today. Since 1994, Plastpro has been a market leader gained through the development of our exclusive Hydroshield Technology™. With the introduction of a full line of PF™ Frames and door accessories, Plastpro is dedicated to providing the best products on the market today.

## INNOVATIVE RESEARCH AND DEVELOPMENT

Vertical integration means that we can focus on perfecting each individual door component. By maintaining control over each stage of development, from raw materials to finished product, Plastpro has the power and flexibility to innovate every aspect of our products and manufacturing. Plastpro creates truly breakthrough products, offering the widest possible choice of product designs, colors, and sizes. Over the past 10 years, Plastpro has introduced Hydroshield Technology™, BTHP™ Snap-On Frames, and our versatile PF™ Frames line of composite doorframes.

## TAKING ACTIVE STEPS TO PROTECT THE ENVIRONMENT

As part of our ongoing commitment to responsible environmental practices, we are proud to be partners in the U.S. Government's Energy Star Program. As an Energy Star partner, our products have been shown to meet regional standards for energy efficiency and conservation. Research shows that engineered lumber uses smaller pieces of fast-growing wood to obtain the same sizes as lumber from old-growth forests, but with more durability and strength. As a Built Green member, Plastpro's products make a difference for the environment while saving our customers money.

## BACKED BY WARRANTY

We are proud to offer some of the best warranties in the industry. Plastpro's True white oak, Mahogany, and Rustic doors carry a limited lifetime warranty; Smooth Skin and True White Oak doors carry a 25-year limited warranty. Plastpro's doorlites carry a 10-year limited warranty.

## CHOICES

Plastpro understands the importance of having a home that reflects who you are.". That's why we provide the widest range of styles, textures, and sizes found anywhere.

## FIBERGLASS ENTRY DOORS

### PATENTED HYDROSHIELD TECHNOLOGY™

Our exclusive Hydroshield Technology™ features fiberglass reinforced door skins, full-length composite stiles, and composite top and bottom rails to prevent water infiltration on all six sides.

HydroShield™ technology

**FULL LENGTH COMPOSITE TOP AND BOTTOM RAILS:** Additional non-porous protection keeps water from seeping into the door and helps prevent the build up of mold or mildew.

**FIBERGLASS REINFORCED SKIN:** Fiberglass is unmarred by the wear and tear of everyday use and is unaffected by moisture and humidity. Our doors will not rot, splinter, or warp like wood, and won't dent or delaminate like steel.

**FULL LENGTH COMPOSITE STILES:** All Plastpro fiberglass entry doors feature fully composite stiles to prevent water infiltration into the door's insulation and ensures our door will never warp, rot, or rust.

**TRIPLE PANE DECORATIVE GLASS:** Our decorative doorlites provide excellent thermal protection while adding beauty and sophistication to your entryway.

**BTHP™ DOORLITE FRAMES:** Our exclusive frames create a completely unblemished surface around the decorative doorlite for an attractive appearance without unsightly screws or ugly, mismatched plugs.

**ARCHITECTURALLY CORRECT PROPORTIONS:** Plastpro doors are designed with beautifully detailed panels that are identical to traditional wood door construction to create crisper shadow lines and heightened curb appeal.

**INSULATED CORE:**
Our environmentally friendly insulation is 100% CFC-free and provides a high R-value for maximum thermal protection.

- MOISTURE RESISTANT
- ROT RESISTANT
- INSECT RESISTANT
- TWICE THE SCREW HOLDING POWER OF WOOD
- READY TO PAINT OR STAIN

READY TO STAIN

PRIMED
READY TO PAINT

WHITE CAPPED
NO PAINT REQUIRED

- **CLOSED CELLULAR STRUCTURE**
  Ensures doorframe and molding will not absorb moisture and resists splitting, rotting, and insect damage.

- **RIGID POLY-FIBER FORMULATION**
  Plastpro's unique poly-fiber formulation provides durability, support, and reliable strength.

- **TWICE THE SCREW-HOLDING POWER**
  Our unique formulation looks and feels like wood, but is stronger, and more durable.

# SMOOTH SKIN SERIES

Plastpro's Smooth Skin doors are a long lasting alternative to steel doors that provide all the benefits of fiberglass. Made with our exclusive Hydroshield Technology™ our Smooth Skin doors will never dent, rust, or delaminate like steel. Made with a pre-pigmented white skin, our doors resist the appearance of scratches. Excel Homes' standard front door offering is the Smooth Skin six panel door and standard back door offering is the Smooth Skin half lite.

# TRUE WHITE OAK SERIES

The True White Oak Series combines the best features of our Smooth Skin and Oak Grain doors - a traditional oak grain pattern and pre-pigmented UV-protected white skin that resists scratches and yellowing for years to come. Our True White Oak door is the most versatile door in the industry. The door is ready as is in prefinished white, or it can be painted and stained if a primer is applied properly.

# WOODGRAIN SERIES

Our Woodgrain series doors have a rich oak grain pattern that resembles the look, feel, and texture of real wood without any of the problems associated with wood. Woodgrain Series doors maintain the original look and feel of your home, but with all of the benefits of fiberglass. Made with our exclusive Hydroshield Technology™, our doors will never rot, warp, or crack like wood.

## BTHP™ SNAP-ON DOORLITE FRAMES

Our exclusive BTHP™ Snap-on Frames employ a series of specially designed clips that lock decorative glass firmly in place. Our BTHP™ Frames have no unsightly plugs or screws, and create a cleaner, more natural appearance in any entryway. Able to withstand temperatures over 200 degrees Fahrenheit, this frame is perfect for use in any door.
